Dear David,

The Director-General for Research and Innovation reported me about your letter of March 21, concerning the possibility of building partnership with Italian cancer network in the field of oncology.

I share your concern for a sustainable Health Service, since I believe that affordable access to healthcare is a key factor for a full citizenship.

Therefore, I am pleased to let you know that Italy is strongly interested in promoting a partnership, particularly in oncology, in order to strengthen both cultural and scientific ties with Georgia.

To this aim, I propose that with the support of our Embassy in Tbilisi, we schedule a technical meeting in order to set up an agenda, with the involvement of our cancer network, Alleanza Contro il Cancro, leading to bilateral agreement.

Sincerely yours,

Beatrice Lorenzin
