H.E. Mr. Nikoloz Revazishvili

Ambassador of Georgia

The Embassy of Georgia

Doha-Qatar

Subject: Strategic partnership and cooperation between the State of Qatar and Georgia to enhance healthcare delivery system

Dear Sir,

The department of healthcare professions presents to you its compliments

I would like to firstly extend my appreciation to you for taking the time to discuss the various ways we can work together to feed the healthcare delivery system in the State of Qatar with qualified nurses who can constitute as pivotal players. This initiative came in accordance with H.E the Minister of Public Health's recommendation to study the mutually beneficial opportunity of utilizing nurses and other healthcare professionals from Georgia to practice in Qatar.

As emphasized during our meeting and based on the extensive assessment conducted by our department, we have been enlightened and we feel confident that Georgian nurses and other AHP (e.g Physiotherapists, Laboratory..) can fit into the regulatory framework in Qatar. Additionally, I would like to take this opportunity to get some more clarification and details on the following for nurses and AHP:

- Types of academic qualifications offered in the Georgian educational system. If this includes undergraduate/postgraduate degrees and technical diplomas.
- The duration of these programs and the training involved in order to achieve the qualifications.
- The mode of study offered to complete each of these qualifications: whether it involves full time, part time or distance learning.
- The regulatory /accreditation authority involved in the registration and licensing for healthcare practitioners in Georgia as well as any international recognition if any.
- If there are any licensing exam required to take before they can be licensed.

It's also worth mentioning that a Qatari delegation team can be organized to visit Georgia for further assessment and to gain more information in this regard.

Finally, I would again like to assure you that together we can achieve a remarkable progress to strengthen and maintain the bilateral relationship between both countries.

Sincerely,

Dr Saad al Kaabi
